

## Tutorial-2

1. Let  $R = \{(1, 2), (2, 3), (2, 4)\}$  be a relation in  $\{1, 2, 3, 4\}$ . Find  $R^+$
2. If  $A = \{a, b\}$  and  $B = \{b, c\}$ , find
  - (a)  $(A \cup B)^*$
  - (b)  $(A \cap B)^*$
  - (c)  $A^* \cup B^*$
  - (d)  $A^* \cap B^*$
  - (e)  $(A - B)^*$
  - (f)  $(B - A)^*$
3. A finite automaton  $M$  has state set  $Q = \{q_0; q_1; q_2\}$ . Its input alphabet is  $\Sigma = \{0; 1\}$ , with  $q_0$  being the initial state and  $F = \{q_0\}$ . The transition function  $\delta$  is given by the following transition table.

$\delta$	0	1
q0	q2	q1
q1	q1	q0
q2	q2	q2

Give the state diagram for  $M$  and describe the language  $L(M)$ .

4. Sheep go "baa!" or "baaa!" or "baaaa!" and so on. They do not go "baaa" or "ba!" or "!" or ". Construct a finite automaton (with input alphabet  $\Sigma = \{a; b ; !\}$ ) that recognizes "sheep-talk".
5. Find the language of following FA:

6. Find the FA for following language:

$$(a) \quad L = \{a^{2^n} \mid n \geq 0\}$$

$$(b) \quad L = \{a^n b^m \mid n, m \geq 0\}$$

$$(c) \quad L = \{a, b, aa, bb, aaa, bbb, \dots\}$$

$$(d) \quad L = \{\text{set of all strings over } \{0,1\} \text{ starting with } 0 \text{ ending with } 1\}$$
